Title: Applying Ergonomics and Process Improvement to Healthcare Delivery

Instructor(s): Laura Moody

Email: moody_le@mercer.edu

Phone: 478-301-2349

Specialization / Discipline: Industrial Engineering

Description: Students will work with a local healthcare organization to evaluate work places and processes, identify opportunities to apply ergonomic improvements, and propose changes to equipment, workplaces, and/or processes as appropriate. Depending on the nature and extent of the proposed changes, the students may work with healthcare professionals to implement and evaluate them.
